PERSONAL PROJECTS

Online Banking Management System (*Java, JDBC, MySQL, Maven*)

- Built a console-based banking application supporting account management and transaction processing
- Implemented the DAO pattern for clean data-access separation and applied structured exception handling

Employee Management REST API (*Java 17, Spring Boot 3.5, Spring Data JPA, Hibernate, MySQL*)

- Built a Layered Architecture REST API for employee management with CRUD operations, department/name/salary search, pagination, sorting, and batch employee creation
- Applied DTO and Mapper patterns with Bean Validation, global exception handling, structured error responses, and SLF4J logging
- Documented all endpoints with Swagger/OpenAPI and deployed the application to a live server

Consumer-Provider Microservices Communication (*Spring Boot, WebClient*)

- Built two communicating microservices using REST APIs and WebClient for inter-service calls
- Standardized request/response contracts with DTOs and centralized error handling
